SonixTABLET VET

Power and performance for
veterinary ultrasound

Premium imaging that doesn't take up your premium real estate

Premium imaging for veterinary medicine

The SonixTABLET supports all of the advanced features for your practice.

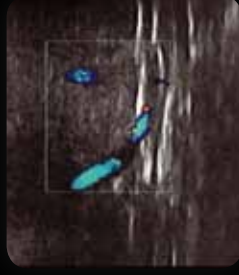

Full touch screen controls for ease-of-use

The configurable touch screen simplifies the use of ultrasound by de-cluttering the console to only buttons and functions used for veterinary medicine.

Small-to-Zero Footprint

Get the full processing power of a larger cart-based system in a body that can be mounted to a wall or onto a roll cart.

Outstanding image quality

Wall or cart mount to use anywhere

SonixTABLET can be mounted to either to a rolling cart or to a wall/ceiling. This will ensure your ultrasound system will be within reach whenever you need it. When the scanning is complete, SonixTABLET can be neatly tucked or rolled away and ready for use when ultrasound is needed again.

General Features

On-system transducer cups
When moving the system from a rolling cart to a wall mount, the optional transducer cups can stay attached to the system.

Universal VESA Mount
The system's support for standard VESA brackets ensures compatibility with most medical mounting kits.

Work on Any Flat Surface
For greater mobility, you can dismount the SonixTABLET and place it on any flat and stable surface.

Carrying Handle
A convenient handle makes gripping the system easier when carrying or positioning the SonixTABLET.

Connectivity & Expandability
Audio, network, and USB ports gives the system access to additional options and features.

Carrying Case
The optional rolling carrying case helps protect the system when in transport from site-to-site.
